SEP 24 2007**AMENDMENTS TO THE CLAIMS**

This listing of claims will replace all prior versions and listings of claims in the application.

LISTING OF CLAIMS

Claim 1 (Currently Amended): A composition consisting of an aqueous solution consisting of a buffer system, a chelating agent, and one or more ~~quaternized~~ quaternized ammonium cationic polysaccharides, wherein said one or more ~~quaternized~~ quaternized ammonium cationic polysaccharides ~~being~~ are sole preservatives and are present in an amount effective for solution preservation.

Claim 2 (Canceled)

Claim 3 (Previously Presented): The compositions of claim 1 wherein said one or more cationic polysaccharides are selected from the group consisting of variations of polyquaternium-10.

Claim 4 (Canceled)

Claim 5 (Currently Amended): A method of producing a composition of claim 1, the method consisting of ~~of~~ combining a buffer system, a chelating agent, and one or more quaternized ammonium cationic polysaccharides, wherein said one or more ~~quaternized~~ quaternized ammonium cationic polysaccharides ~~being~~ are sole preservatives and are present in an amount effective for ~~solution~~ preservation of said composition.

Claim 6 (Original): The method of claim 5 wherein said one or more cationic polysaccharides are selected from the group consisting of variations of polyquaternium-10.

Claim 7 (Canceled)

Claim 8 (Canceled)

Claim 9 (Canceled)

Serial No. 10/725,049

SEP 24 2007

Claim 10 (Currently Amended): A composition consisting of a buffer system, a chelating agent, one or more tonicity agents, and one or more ~~quaternized~~ quaternized ammonium cationic polysaccharides, wherein said one or more ~~quaternized~~ quaternized ammonium cationic polysaccharides ~~being~~ are sole preservatives and are present in an amount effective for solution preservation, wherein said composition has an osmolality in a range of 200-450 mOsm/kg.

Claim 11 (Canceled)

Claim 12 (Canceled)

Claim 13 (Previously Presented): A method of using the composition of claim 1, the method comprising:

contacting a surface of a contact lens with said solution for a period of time suitable to eliminate a microbial burden on said contact lens.

Claim 14 (Previously Presented): A method of using the composition of claim 1, the method comprising:

contacting a surface of a medical device with said solution for a period of time suitable to eliminate a microbial burden on said medical device.

Claim 15 (Canceled)
